CANCER CURED

—AND A—
LIFE SAVED
By the Persistent Use of
Ayer's Sarsaparilla

"I was troubled for years with a
sore on my knee, which several
physicians, who treated me, could not
cure, assuring me that nothing
could be done to save my life. As a
last resort, I was induced to try
Ayer's Sarsaparilla, and, after tak-
ing a number of bottles, the sore

disappeared and my general
health improved. I persisted in this
treatment, until the sore was en-
tirely healed. Since then, I use
Ayer's Sarsaparilla occasionally as a
tonic and blood-purifier, and, in-
deed, it seems as though I could not
keep house without it."—Mrs. S. A.

The democrats saved Mississippi
out of the wreck.

SOUTHERN Minnesota and the De-
kotas were treated to a foot of snow
yesterday. As yet we are in the
banana belt.

Our democratic brethren are con-
soling themselves with the thought
that "the Lord loves those whom He
chastises."

In Maryland and Kentucky Thank-
sgiving Day can be celebrated and
observed with a relish this year.
Texas will probably be with us next
year.

Horseless carriages are to be
manufactured in Minneapolis, and
the proprietor of the factory claims to
have orders enough to keep the in-
stitution running.

The people of Melrose seem to
think they were hoodwinked when
they voted \$15,000 to secure the di-
vision headquarters of the Great North-
ern, according to the Minneapolis
Journal, for the railroad men have
formed a co-operative store and will
all patronize their own establishment.
The business men don't like it a bit.

That the free silver craze is dying
out the results of the last election
clearly show. In Kentucky, for the
first time in its history, a democratic
candidate for governor was defeated
because he repudiated the sound
money platform of his party and de-
clared for free silver, and in Nebr-
ska where the democratic party was
divided on the money question, the
sound money wing polled three votes
to one for the free silver crowd. In
all other states the Republican party,
the party of honest money, made tre-
mendous gains.

The joint debate between "Coin"
Harvey and Congressman McCleary
at Duluth on Wednesday evening
resulted in the decision that the rep-
resentative from the second district
clearly had the best of the argument.
The News-Tribune says Mr. McCleary
gave indisputable authority for every-
thing he claimed and backed up
every assertion with unimpeachable
proof. His criticisms of Mr. Harvey's
book were unanswerable. It requir-
ed no discriminating mind to grasp
the fallacy that underlies all of Mr.
Harvey's arguments and appreciate the
plays he continually made for popular
approval. His evasiveness was
equalled only by the cleverness with
which he took advantage of every
faltering statement by Mr. McCleary
and his jugglery of his own writings
stamped him as one who advances his
ideas for business reasons and not
from honest convictions.

Dodging the Question.
The Journal this week devotes a
column and a half to build up a man
of straw for the purpose of tearing it
down, in order to detract attention
from the question at issue. It uses
as a pretext the statement in last
week's DISPATCH that the price of sil-
ver has nothing to do with the price
of any other commodity, as the Jour-
nal has sought to hoodwink its read-
ers into believing. The Journal
quotes from the DISPATCH as follows:
The price of every commodity is regu-
lated by the law of supply and de-
mand. Neither silver, gold, nor
anything else (meaning the price of
these commodities) except this law of
supply and demand, have anything to
do with it, etc.

After publishing the above, it first
tells of its editors superior knowledge
on the question of finance, and the
total ignorance of every one else,
which has got to be a cheatman be-
cause repeated so often, and then it
publishes a mass of statements from
ancient writers to show that prices
are affected by contraction or expan-
sion of the circulating medium, a
question which is not under discus-
sion at all. What this has to do with
the price of silver causing the low
price of agricultural products, which
is the question at issue, and which we
clearly disproved, we are unable to
see, unless it is to detract attention
from the real question. Nobody de-
nies that contracting the circulating
medium, especially if it is done to
such an extent as to be unequal to
the requirements of conducting the
business of the country, would affect
prices somewhat, but what has that
to do with the price of silver regulat-
ing the price of other commodities,
as claimed by the Journal? Nothing
whatever, hence the Journal wasted
its time and space and deceived no
one.

A Deer Hunter's Luck.
John J. Baston, of St. Louis Park,
representative to the legislature from
the Thirty-fourth district, is reported to
be in a condition of mental anxiety.
In the last days of October, that is,
a week or so ago, in company with
others, he left this city for his annual
hunting grounds north of Brainerd.
On or about Nov. 1st, he shipped from
a point in northern Minnesota to
Minneapolis four deer as a trophy of
his hunt. A slouch of the fish and
game commission met the deer at the
train and seized them upon the theory
that they had been shot out of season.
Mr. Baston's defense is reported to be
that he did not shoot the deer at all,
but caught them while bathing in a
lake and held their noses under water
until they were drowned, and this, too,
in the lawful season. Meanwhile he
is very wrathful over the loss of his
game—Pioneer Press.

Glorious Victories.
The result of the election on Tues-
day was no surprise to the people of
these United States, although the
most sanguine did not expect to see
the majorities rolled up to such high
figures. With Maryland and Kentucky
in the republican column the solid
south that used to be the democ-
rats, whose pride it was, were a very
bad state of demoralization. With
the demonstrations just made nothing
is more certain than the return of the
republican party to power in 1896.
Utah comes into statehood with an
entire republican government and
legislature. The nine northern states
gave republican majorities that far
exceeded the mark of previous years.
New Jersey's 20,000 republican ma-
jority has placed that state out of the
doubtful column. The republicans
have a perfect right to feel jubilant
over their success. Speaking of the
three years of democratic inconstan-
cies, the Pioneer Press says:

The American people had more
than enough of it long ago, and they
said so, when they arose last year and
by overwhelming majorities in every
northern state took congress out of
democratic control and shut its doors
against the leaders who had declared
that their work of mischief was not
yet half accomplished. On Tuesday
they ratified the verdict of 1894, and
in eleven states they passed a solemn
sentence of condemnation upon the
democratic party. A year from now
they will proceed to execute that
sentence by the expulsion of democ-
ratic rule from every department of
the federal government. One result
of yesterday's election is to give the
straight republicans the full control
of the senate in 1897, by insuring the
return of four republican senators in
the place of democratic ones from
Maryland, Kentucky and New Jersey,
respectively. But the chief significance
of its bearing on the presidential
election next year and in the assurance
it gives of the steadfast determination
of the American people to put an end
to the blundering and disastrous rule
of the democratic party and to restore
to the full control of the government
the party which best represents the
country, the good sense and the
honesty of the American people, and
the policies which all experience has
shown to be essential to the prosperity
of the country.

What We Are Coming to.
Rockaby baby, your mamma has
gone; she's out at the census and
will be till dawn; she wore papa's
trousers and in them looked queer;
so hushaby baby your mamma is here,
Rockaby baby your mamma's a ter-
ror, she's run three conventions, de-
clared for three fellows; she's great
on a straddle, way up on a vote, so
hushaby baby your papa's the "goat,"
Rockaby baby the dishes are clean,
papa's done scrubbing and put on the
beans; your mamma is late, seems
always to lag, but heaven help papa,
if she comes home with a jag. So
Rockaby baby I'm glad you can't talk,
for papa got lonesome and went for
a walk; he was met by a widow—a
regular "dream," your papa's a dandy,
but not one of the "cream." So
hushaby baby for flirting's no sin,
your daddy was tempted, she tickled
his chin; she was so plump and so
pretty, so neat and so trim, so hushaby
baby your dad's in the swim.—Ex.

The new population of Minnesota has more than doubled during the past twenty years. It is now estimated at between 100,000 and 120,000.

Earl Spencer says he has tried everything, from shooting, rifle-shooting and other sports, but none of them come up to hunting with a pack of hounds.

An ice locomotive was some years ago constructed for use in Russia. It is employed to haul freight between St. Petersburg and Constantinople. The front parts rest on a sled, and the driving wheels are studded with spikes.

In Syria, near Damascus, there is said to grow a hummingbird plant, the flower of which bears a close resemblance to a hummingbird. The breast is red, the wings are a dark green, the back yellow, the head and tail a bluish-black.

As a general rule, Madame Sarah Bernhardt holds that an actor should retire from the stage at the age of thirty, although she confesses that she has seen many who should have disappeared at the age of five-and-twenty.

The leader of a gang of incendiaries in Brooklyn has received a sentence of forty-eight years for arson, which is an indication that this crime, in this line, is well as property, will get more attention hereafter than in the past.

Lord Lytton, the novelist, left orders that before he was buried a long needle should be run through his heart. He had taken the precaution to tell the doctor of his wish, and it was carried out.

It is an interesting fact that in the Rhonda valley, in South Wales, near Treowky, a jet of gas may be seen burning under a spring of water. The gas is believed to escape from the coal mines, which are so numerous in the valley, and it is a purely natural phenomenon.

On his Dorsetshire estate, Lord Alington has a "white farm." It is so called because every animal on it is white. There are white horses, white cows, white donkeys, white hares from Siberia, and a white pigmy bull. The dogs and the cats are white, and so are the rats and mice.

This has been a year of big crops, and one of the largest is England's crop of ultimatums. They are flying through the air in all directions, from China to Ashante, from Turkey to Louisiana. The vastness of the British bluff will become suddenly apparent some day.

The tabernacle at Salt Lake City, the capital of Utah, is, in respect to its acoustic properties, the most remarkable place of worship in the world. It is constructed to hold a person standing at one end to distinctly hear the sound of a pin dropped into a hat at the other.

There are two sorts of tattooing in use among the women of the Congo. One is common to all the members of the same tribe, and indicates the origin and birthplace of the subject. It is an infallible and perpetual certificate of birth and nationality. The other sort of tattooing is simply fancy and coquetry.

In Vienna there are women whose business it is to be "physicians' subjects." One of them hires herself out to medical men as a subject on which they may illustrate hysteresis and rheumatism. She receives about three shillings per hour, furnishing her own instruments. Her throat has so much sensibility that the manipulations produce no irritation.

The Russians, in modern times, have only two younger emperors than Nicholas II. These were Peter II, who succeeded in 1717, at the age of twelve, and Alexander I, who succeeded in 1801, at the age of twenty-five. Nicholas II, who succeeded in 1894, at the age of twenty-nine, thirty-seven and thirty-six.

The chief characteristics of English female beauty are regularity of features, the thin, short nose, predominant blue eyes, and hazel eyes, light and dark flaxen hair, a well-developed bust, and a figure of the average height of women, and more inclined to stoutness than the delicate, swaying leanness so popular with certain classes of novel writers.

The oldest institution respecting the use of the diving-bell in Europe is the relation of an exhibit at Toledo, before Emperor Charles V., in the middle of the sixteenth century, when two Greeks, in the presence of several thousand persons, let themselves down into the sea in a large, inverted kettle with a burning light, and came up again without being wet.

The volcanic island of Tanna, one of the New Hebrides group, has been for many years in a constant state of eruption, emitting a column of fire by night and smoke by day, and is heavily shrouded in a great distance. Such is the certainty with which this flame appears that vessels in the vicinity are instructed by their sailing directions to look out for it just as they would be for an ordinary light house.

The annual report of the quartermaster general of the army shows that during the year the army was liberally and promptly supplied with all necessary articles of clothing and equipment of satisfactory quality. The cavalry mount of today exceeds that of any previous time, and is superior to that of foreign armies. The average cost per head was \$35.44 for cavalry horses and \$18.04 for artillery horses.

One indication of a coming upheaval in Turkey is the gathering of special newspaper correspondents in the region of Constantinople. The British fleet is near the city on one side and the Russian fleet on the other. The French, Austrian and Italian fleets are ready to move in that direction. It is well understood that the sultan's readiness of reform is worthless, as he has neither the disposition nor the power to enforce it. The news from Constantinople this winter will probably be important.

NOTABLE EVENTS OF THE WEEK IN A CONDENSED FORM.

Washington Talk.
Owing to treaty obligations, Secretary Hay has refused to allow the building of gunboats on the great lakes.

Controller of the Treasury Bowler has decided that congressmen are not entitled to government stationery until they have taken the oath of Secretary Olney has called United States Ambassador Easton, conveying to him an expression of condolence on the death of President Cleveland and himself upon the death of Mrs. Easton.

The centennial anniversary of the formation of the First Presbyterian church of Washington, and the beginning of Presbyterianism in that city, will be celebrated during the week commencing Sunday, Nov. 7.

The detail of officers for the cruiser Boston has been completed, and a more detailed list will be published in the Washington correspondent for the Boston Evening Transcript.

People Talked About.
Mrs. Humphrey Ward is said to have saved \$100,000 from the receipts of her novels.

President Faure of France, although he is a confirmed bachelor, is said to be an expert swordsman.

Ex-Chief of Police Thomas Byrnes has sailed from New York for Germany, and there is some mystery about his journey.

Prof. Joseph F. Rowland, noted as a composer and conductor for Gerster, died at San Francisco, aged sixty-three, of cancer of the stomach.

Elias Morgan, aged sixty-three, died at New London, Conn., of general debility, after an illness of six months. He was the founder of the Morgan Iron works.

It is reported that ex-Queen Liliuokalani has returned to Hawaii, Australia, in which country she is expected to arrive in the autumn of 1900, after a long stay in London.

H. N. Pillsbury, president of the St. Paul, Minn., has been elected to the position of president of the National bank of Chicago, announced that, on account of ill-health, he will retire on Jan. 1, and will probably be succeeded by J. C. McMillan.

Jesse Coxy, son of the common-lawyer, died at New York, aged thirty, of cancer of the stomach.

Mr. C. J. O'Connell, president of the National bank of Chicago, announced that, on account of ill-health, he will retire on Jan. 1, and will probably be succeeded by J. C. McMillan.

Mrs. Charlotte A. Coy, known on the stage as Mme. Carlotta Cozzani, died at her residence in Brooklyn, N. Y., of cancer of the stomach.

Henry Rochefort is now telling the story of his career through the columns of a Paris journal, and it is said that an American publisher has agreed to buy the rights of the work for the exclusive right of publishing his memoirs in the United States.

Mrs. Emily Rush Davis, the only sister of the late Senator John Davis, died at her residence in Brooklyn, N. Y., of cancer of the stomach.

The reported volcano on Mount Olympus, Mass., is nothing more than a timber fire in a deep canyon.

Mrs. C. N. Lindley, daughter of the late Gen. James H. Lindley, died at her residence in Brooklyn, N. Y., of cancer of the stomach.

The Harvard faculty refused to grant a petition presented by the Harvard Musical society asking that the school be allowed to take the usual Western trip.

The steamer Commodore L. and cargo, seized some days ago at Wilmington, N. C., with arms on board, alleged to be for the use of the Cuban insurgents, has been released.

A large number of citizens congregated at the New York church at St. Paul, for the express purpose of praying for rain. Such a scarcity of water was never before known in that section of the state, and the church has been closed during the past year.

The last fixed span of the new Pacific short line bridge across the Mississippi river at St. Louis, Mo., has been completed. The substructure of the bridge is entirely complete, and the superstructure is well advanced.

The Buckley & Douglas Lumber company let contracts at Manistee, Mich., for the largest saw plant in the United States, to be located on the shore of Lake Superior, and capable of sawing 2,000 barrels a day. Both the grain and vacuum pan processes will be used.

Prof. A. K. Atkinson, superintendent of the public schools at Rushville, Mo., was placed under arrest on the charge of lewdly assaulting Miss Van Hoozer, a beautiful young woman twenty years old, who has been a pupil of Atkinson's.

A sensational capture was made at Philadelphia when Edward Stillman, an engineer, was arrested, charged with the murder of a woman. It was the culmination of a peculiar mystery that has puzzled Clifton Heights for two years. He is the famous "John" who has terrorized women and children. A feature of the case is that Stillman says he dressed in women's clothes in order to run down his wife's alleged admirer. Stillman was on his way to a dance when arrested.

Two Indians on the Okanagan (Wash.) reservation, stole a twelve-year-old girl, Mary, daughter of James Smith, a settler, and took her to the mountains, tied her, Mazepella, upon a cayuse, and turned her adrift on the wild country to the north. She nearly died of starvation, and was nearly killed by a party of searchers on looking for her.

Foreign Gossip.
Rumors have been received in Lima, Peru, of a probable revolt, but they have proved incorrect.

Under the treaty between France and Madagascar, the latter becomes a more dependent colony. Several large landed proprietors from Holland have recently been visiting Mexico for the purpose of selecting land for the purpose of settlement.

Generals Navarro and Canellas, while skimming in the province of Santiago de Cuba, exchanged shots with the Cuban forces, who were defeated.

At St. John's, N. B., news is received that 500 wreckers made an attempt to rob the wreck of the steamer Mariposa, but were driven off by customs officers.

The Berlin correspondent of the London Standard says the Central News Agency, which has been published in St. Paul, Minn., is a "stage manager" in a "poorly-invented" and "poorly-executed" manner.

In the divorce suit of Woodson of London it was stated that Mrs. Woodson, the defendant, lived for a time in the custody of the duke of Orleans, the pretender to the throne of France, on his household at the Savoy hotel.

The trial of the marquis de Navarre, charged with the murder of his stepson in 1885, has begun at Bourges, France. The case is a sensational one and has attracted considerable attention.

By THE DUCHESS.

CHAPTER VII—(Continued.)

"No, to myself, also. Could anything be more murderous than the way Mr. Morgan treated that last scherzo? It was horrible. Yet I endured it—lived. I am now talking to you."

There is nothing beyond a pretty compliment to his superior powers as an accompanist conveyed in these last words; but Dartford, who has been a good deal spoiled by a certain class of

All except Dalrymple! His heart seems on fire. To see her there, so thoroughly bon camarde of that contemptible liberty, makes his own honest blood boil in his veins. It certainly wouldn't have boiled at all had he been "being talked to" by another girl; it probably would not so much as reached a tepid heat; but that is all he cares to aspire to. He leaves only one desire—that the good old dark ages were once more here.

"Do you think I am not sensible of that?" says he with considerable emphasis and an earnest look that is not to be mistaken. "I am, Miss Fairfax says at him, and then, as if a little uncertain as to his meaning, but charitably supposing that it is not nonsense, but an admirable service of old Nature that has actuated the enigmatical reply, says kindly:

"Well, it's very good of you, I'm

the body would be accounted as a mere casualty—a necessary hint—a playful reminder that your patience had a limit and no more.

In truth, it seems to Dalrymple that her friend, standing so close to him, looking there with her violin poised against her shoulder, though in reality she is as fair a thing as Nature ever made, "a sight to make an old man young."

sure. What?" says he, pausing as one might who is partly deaf and has failed to comprehend. If he had been enigmatical to her, she has been doubly so to you! good!

"You are very good, too good," persists she, in her own reading, and feeling so ashamed of such praise from a man who really understands music. After all! What is she?"

The world has yet to prove her a

"Oh, my just so," says Darford, still at six; and now with his usual beaming smile that has so little in it. "By Jove! it's the first time I've been told that!"

Somebody coming up to Eleanor at this moment, and touching her arm, she impatiently turns to her right. Dairymple, his face paler and sterner than usual, is standing before her. "What is it?" she asks, anxious to hear Lord Darford say that your grand-

without which it know no real life.

His playing is remarkable, even in an age where one insists on perfection or nothing; and her companion does her justice. Darford indeed expresses his admiration, and she is conscious of feeling Strange anomaly in a man to whom heart is unknown. He accompanies her, indeed, with such taste, and such sympathy, that one might readily believe that at least the

There is something in the grave repression of his so very near to anger in his eyes that enrages Miss Fairfax, she gives him but curt reply. "Certainly," she says, "He is so sure he, so agreeable always, that I am sure he will not be so very near to anger as you are." "I am sure he will not be so very near to anger as you are," she says, "I am sure he will not be so very near to anger as you are."

"No to her, to you," says he softly—so low that Marygrove cannot hear the words, but can mark the bee-like hum of his voice, and feel the pang that contracts his heart.

"It is a compliment!" says Eleanor, prettily, but utterly without sentiment, and presently Daffodil settles himself.

"I have a little to say," says he, mistakenly a love song, of the post-terrace Frigates type, and expensively bound as it is holding the room spell-bound.

Then follow some charming bits of French, a recitation of Elmer's first love story, and a little of the Daffodil, because he plays now as he never played before, with a spirit, a brilliancy that is rivalling. But his touch, too, he has thrown that his—

"So that our hearts be one,
So that our love be true,
The world may laugh or frown
At us, and you and I,
Men may be wise or fools,
Stars may die out above,
Though he had caught it from her,
And now it is over, the last long-
drawn note has sounded, and silence,
to poverty-stricken, shuddering, Eleonor
rises aside and looks at the man with
abrupt way, and with shining eyes
and faintly flushed cheeks moves
among her guests. There is a suggestion
of triumph—but triumph unsatisfied—in
her whole air. To Dalrymple,

It is a distinctly passionate little effort on Dartford's part, but, unfortunately, Mrs. Maxwell's little, light-hearted, "I'm a girl of thirty," is not so, last, but not least, for him, and who had asked him to sing, takes the devotion, the words, the subdued passion, entirely as her own. "What a heavenly song!" says she, and so do we.

"Love that makes the world go round," says he curiously, making a pretence of filling up her sentence. "That is about as near rubbish, you know, as they make it in the days of yore. That's the world round. You take my word for that. That's the true axis. You take my

"There is something a little brutal about the man—a little vulgar. Having been brought up to the smallest civility, I cannot but be shocked at his courtesy," "clocked off" he would himself have said, this woman with whom he had dallied many an hour and oft, he crosses the room to where she sits, and she smiles kindly at old General Maxwell.

"I am telling Miss Fairfax that she has been a little unkind to us to-day," says he, "but I will not say more."

"It is half an hour later. A country, it has been said by Mr. Mayne, who is now to Mrs. Maxwell's deflection and eager for an occasion to be revenged upon her rival, as she has grown to regard the unbecomings Hester, some broad-headed by the fact, since she

Miss Nell, sweetly: "Are you f the vein, Lord Dartford? Come, then, we'll do our best to charm this shy, earnest, if kindliest of critics." She then turned to the young man, and, with truth, has a fine knowledge of music, and a love for it passing all others.

Moving across the room beside Lord Dartford, she happens to pass her hand over the forehead of the young man, and, in the morning, the malicious spirit that has kept closely at her side all

Miss Fairfax and Lord Dartford entered the conservatory thirty minutes ago, they have been lost to other society but for a few minutes. The elegant presence of numbers in the party, and the hostess deserves, in Mrs. Maxwell's opinion, instant punishment, and so with a rather nasty little smile she now rises, and sweeps down upon Lord Dartford, and, in a few minutes, she has determined fashion. It is still distinctly early, but that she has re-

the evening prompts her to throw him
the defiant word or two.

"Yes, I will give you some-
thing to dwell upon," cries she
with radiant sauciness, looking
back at him over her shoulder.
THAT TROUBLESOME GIRL.

After, with one hand lifted, she
glances at her watch, and ground
her neck. "Something to remember.
Don't lose a note. I feel I am going
to excel myself! Lord Fairfax has in-

fused to consider it so, is evident.

"Yes, it grows chilly, and the gener-
al's throat is so troublesome. No, no,
please do not disturb Miss Fairfax.
You will say good night to her, and
will you not feel sure he must
have good reason for depriving us of
her society for the past hour, and I
would not for worlds be the cause of—"
Now I beg you will let me steal away

"It is an audacious little speech, and that the extreme childishness that characterizes her, might be termed bold. It makes her nothing, however, save a naughty child. Dalrymple receives her provoking gaze steadily, with an unflinching eye, and a smile that betrays no emotion. But, unfortunately, it is so much in earnest that she gives himself away a good deal, and permits her to see only the uncommonly good side of her nature. For myself, they are so satisfying. One never knows what they are going to do next. Good night."

"One moment," says Lord Carbury, in his coldest, haughtiest tone. "No!" he says, with a cold, standing near, and as they regard Mrs. Maxwell's little smiling face with ill-suppressed anger; "tell Eleanor to come at once and bid Mrs. Maxwell good night; you will convince her."

"You are so entirely a person to be congratulated on every point," says Dartford, as they move on, "that one crumpled rose-leaf cannot afflict you greatly. I should say that conflict of yours is a thing of no account."

"How?" says Dartford with suspicious innocence, looking quickly round.

"Surely beggar, eh?" says Dartford, secure in the knowledge that she had

Mrs. Maxwell, "When she gets on the subject of music she forgets all things."

"(Even her manners)" is on Mrs. Maxwell's distant tongue, but she reserves it, and, satisfied with having brought the attention of the entire room to the fact that Miss Fairfax has been for the past half-hour, *te-te-te-te* with a man of letters, *te-te-te-te*, and ear charmed with him as to be forgetful of even the commonest et-

at the farthest end of the conservatory, a slender figure, gown'd in white satin, is seated—the lace flourishes of her dress gleaming like snow against the dark background of myrtle leaves.

It is Eleanor. She is hardly seated, indeed. She has just risen—one hand pressing against the arm of the lounge—her attitude all of the lounger's surprise—her face uplifted to Darford, who is bending toward her—an impassioned glance within his eyes.

Something—he never knew what—compels Dairymple to stand still, as his eyes light on the nobleman. He is so far away that he cannot see into Dairdoff's eyes, to note the expression in Eleanor's. It is an instant's halt, but long enough to work a world of mischief. Even as he gazes, Dairdoff stops and looks at his hearer, across from Eleanor's slight form, his head bends toward hers—

The S. S. Convention.

The Sunday School Convention held in this city last Saturday, Sunday and Monday, was a great success in every respect. Great credit is due to Rev. J. C. Huntington, who was largely responsible for the management of the convention. The pastors and S. S. workers of the churches did all in their power to assist him.

The meetings in the M. E. church Saturday afternoon and evening were well attended. The children's meeting was held by Rev. J. C. Huntington whose blackboard work did much to render all his services interesting.

The program was carried out by workers in the local Sunday schools. There were quite a number of delegates from the Sunday school in the country, and two minute reports were made from all the Sunday schools represented. Sunday at 3 p. m. the Cong. church was crowded at the exercises consisted of music and brief addresses by the pastors. All seemed to feel that it was good to be there.

Monday evening a large audience filled the Congregational church to listen to speakers from Minneapolis. Very rarely, indeed, has it been the privilege of a Brainerd audience to listen to a program of such uniform excellence. Rev. Jas. McAllister spoke interestingly on the aim of the Sunday school.

Rev. G. R. Merrill D. D. followed with an address on Bible study. Dr. Merrill is an expert in this department. He has conducted classes in Chautauque assemblies and Biblical institutes, and has no superior in the state. All present will never forget his exposition of the 23rd Psalm. It was very difficult to follow such a speaker and hold the attention of the audience. But Mrs. O. S. Chapman succeeded perfectly in her illustrated lecture on Kindergarten methods in the Sunday school. Mrs. Chapman is the wife of a physician of prominence and has a primary class of 300 members in Park Avenue Congregational Church, and is considered to be the leader in her department. She will be sure of a large audience whenever she may favor Brainerd people with an address.

She gave an informal talk to mothers in the Baptist Church on Tuesday morning.

A Record Breaker.
Attorney F. E. Price returned Thursday evening from Brainerd where he transacted some legal business. "If anyone had told me except Judge Holland I wouldn't have believed it, and I hardly expect you will believe me, but I tell you it is just the same," said Mr. Price to the Herald. "Proceed," interrupted the Herald, "your word is as good as your note." "Well, the Brainerd and Northern Mills did what appeared to me a wonderful stroke of business this week in the line of lumber manufacturing. The company cut logs on Loch Lake, loaded them to the mill, sawed them into boards, run them through the dry kiln, loaded cars and started a full train of the finished product on its way to Winnipeg as early as last night, all within forty hours. If that isn't a record breaker I don't know anything about log-rolling.—Grand Rapids Herald.

Garrison News Notes.
The snow came a little too early for the hunters, but quite a few of them started north in a hurry so as to have a little hunt while it lasts.

There was quite a large crowd attended the auction at the P. O. Saturday, and there were some thirty head of horses sold.

Mr. John Ireland preached at the Dykeman school house last Sunday and will preach again in two weeks at the same place.

Quite a crowd gathered at Mr. Henry Perssons last Friday night, and enjoyed a good time. They danced until the small hours of the morning.

We are glad to see Mrs. R. J. Rafal improving so fast.

Mr. Ed Hall has gone to Brainerd to work at the barber trade.

Mr. James Coffel left for Annandale, Minn. last Monday.

Mr. D. S. Borden has got the work completed on the roads for which money was appropriated by the county.

Miss Adah Dye gives her scholars the Hebrew Scriptures, as antiques almost any writings contain frequent allusions to foot-gear, making it certain that shoes or sandals were in quite general use. In this connection, it is interesting to note the kinds of shoes worn by various nations.

The Portuguese shoe has a wooden sole and heel, with a ramp made of patent leather, fancifully showing the flesh side of the skin.

The Persian footgear is a raised shoe, often a foot high. It is made of light wood richly inlaid, with a strap extending over the instep.

The Siamese shoe has the form of an ancient canoe, with a gondola bow and an open toe. The sole is made of wood and the upper of inslaid wood and cloth, and the exterior is elaborately ornamented in colors, and with gold and silver.

The sandal worn by the Egyptians is composed of a sole made by sticking together three thicknesses of leather. This is held to the foot by passing a band across the instep. The sandal is beautifully stitched with threads of different colors.

The Musselman's shoe is of heavy leather. It is adjusted to the foot by a wide leather strap, which runs from the heel and buckles over the instep. The only ornamentation is the fastening of two leather plums on the right side of the toe.

In our own country, shoes are of almost infinite variety in both material and style. There are those for the house, the carriage, and for walking. The wearing of shoes, however, does not imply that you should walk to Chicago, Peoria, St. Louis, Kansas City, Omaha, Lincoln, St. Paul, Minneapolis or Denver, when you can travel so safely, comfortably, swiftly and cheaply by the trains of the Burlington Route. Ask your home agent for tickets by this route, or write to W. J. C. Kenyon, Gen. Pass. Agent, St. Paul, Minn., for maps and information.

The application of T. McMaster for a permit to move his street scales from Front street to Sixth street south, was referred to street committee with power to act.

Propositions were received from N. W. Harris & Co., and the First National Bank of Brainerd, for the purchase of the \$7,000 bonds, to be issued Dec. 11, 1895, the proposition of the First National Bank being accepted, and the city attorney was instructed to submit a resolution conforming to the motion.

Jas. McCabe was granted a liquor license and his bonds approved.

The following resolution was adopted:

RESOLVED, By the Council of the City of Brainerd, That that part of the road leading Oak street at the southwest corner of the southeast quarter of the northeast quarter of Sec. 30, T. 45 N., R. 30 W., in the City of Brainerd, in Crow Wing County, Minnesota, and thence running across said 40-acre tract of land easterly in a northwesterly course and crossing the east line thereof a few rods south of the northeast corner of said 40-acre tract of land is vacated and abandoned.

The following resolution was adopted:

RESOLVED, By the Council of the City of Brainerd, That the sum of \$15,000 be raised by taxation upon the taxable property of the City of Brainerd for the next fiscal year, the rate of such tax levy, and the purpose for which the same is made to be as follows, to-wit: By law.

Sinking fund.....1 mill Interest on bonded debt.....5 mills Water rental.....4 mills

The aforesaid tax is hereby levied upon all property, real and personal, within said City, except such as may be exempted by law.

Communication from the Superintendent of State Farmers' Institute was read and referred to the finance committee.

The street commissioner was instructed to notify Mr. McKay to have the Fourth street crossing repaired.

Motion was made and carried that the matter of purchasing a steam road roller and rock crusher be referred to the street committee with power to act. Council adjourned.

About Shoes.
Notwithstanding the admiration we have for Whittier's poem of "The Barefoot Boy," and the interest we feel in the youngster, mankind in all ages has been prone to shoe its feet. Probably the cave-dwellers had no shoes, but as soon as man began to have an existence worth recording, he invented coverings for his feet. The Hebrew Scriptures, as antiques almost any writings contain frequent allusions to foot-gear, making it certain that shoes or sandals were in quite general use. In this connection, it is interesting to note the kinds of shoes worn by various nations.

The Portuguese shoe has a wooden sole and heel, with a ramp made of patent leather, fancifully showing the flesh side of the skin.

The Persian footgear is a raised shoe, often a foot high. It is made of light wood richly inlaid, with a strap extending over the instep.

The Siamese shoe has the form of an ancient canoe, with a gondola bow and an open toe. The sole is made of wood and the upper of inslaid wood and cloth, and the exterior is elaborately ornamented in colors, and with gold and silver.

The sandal worn by the Egyptians is composed of a sole made by sticking together three thicknesses of leather. This is held to the foot by passing a band across the instep. The sandal is beautifully stitched with threads of different colors.

The Musselman's shoe is of heavy leather. It is adjusted to the foot by a wide leather strap, which runs from the heel and buckles over the instep. The only ornamentation is the fastening of two leather plums on the right side of the toe.

In our own country, shoes are of almost infinite variety in both material and style. There are those for the house, the carriage, and for walking. The wearing of shoes, however, does not imply that you should walk to Chicago, Peoria, St. Louis, Kansas City, Omaha, Lincoln, St. Paul, Minneapolis or Denver, when you can travel so safely, comfortably, swiftly and cheaply by the trains of the Burlington Route. Ask your home agent for tickets by this route, or write to W. J. C. Kenyon, Gen. Pass. Agent, St. Paul, Minn., for maps and information.

The School Board.

The board of education held their regular monthly session on Monday evening at which time regular routine business was transacted. The finance committee were authorized to make a loan of \$3,000 to cover pay roll and expenses, and Mr. Skinner's salary was made \$75 per month from September until the close of the school year. Matters pertaining to the closing of the West Brainerd school were laid over until the next regular meeting, at which time Mr. Cullen will present a petition to the board. Miss Mary E. Burrus was elected to succeed Miss Monahan as teacher, the ballot standing four for and three against. A large number of bills were allowed and the board adjourned.

Three men, father and two sons, named Ward, passed through the city Friday en route to the deer country north of Brainerd. They live at Holding's Ford, and do a little hunting every fall. Not many years ago they could get good sport much nearer home, but now they go over 100 miles to find deer. * * * Joseph Harris, who was for many years a resident of Pike Creek, was down from St. Matthias, Crow Wing county today. He bought a farm there a few years ago, and has now about 50 acres under cultivation.—Little Falls Transcript.

DELICATESSEN SMACKS.
Brewed Students of Culinary Arts These Who Know How to Tell Goods.

Were the men who keep delicatessen stores born with their lips smacking? If not, they must have acquired the habit soon after birth, or they would not be able to throw so much union into the smack as they do when they are pointing out the savory qualities of the various articles in the stores. The delicatessen man has a watery eye, a rubicund cheek and a mouth that seems to taste everything he has for sale. He takes a long carving knife in his hand and delicately touches with its point a piece of boiled ham.

"Very good," he says confidentially as he looks from you to the ham. "The best ham I ever tasted. (Smack.) Try a piece of this."

He cuts off a thin slice some two inches square, and as you put it into your mouth he smacks his lips to give it a flavor and looks at you expectantly with his liquid eyes. Should you say you don't care much about the ham he looks mildly hurt and digs up a piece of cheese from a silvery covering, letting off a volley of smacks as he does so.

"There," he says, "that is a piece of honeysuckle from age, made among the mountains of Afghanistan, with a dash of the bouquet that was so much in demand in Turkey in the days of the great Ali Bey." (Smack.)

He says all this with solemnity, though you know he is inventing the whole story, and gives you a piece of cheese that curls up the edge of the cheese knife with its strength as he smacks his lips and seems to think you should be carried away by the delicacy. You are almost, for it is strong enough to carry away anything, and

Highest of all in Leavening Power.—Latest U. S. Gov't Report
Royal Baking Powder
ABSOLUTELY PURE
The Sunday School Convention held in this city last Saturday, Sunday and Monday, was a great success in every respect. Great credit is due to Rev. J. C. Huntington, who was largely responsible for the management of the convention. The pastors and S. S. workers of the churches did all in their power to assist him.
The meetings in the M. E. church Saturday afternoon and evening were well attended. The children's meeting was led by Rev. J. C. Huntington whose blackboard work did much to render all two services interesting. The program was carried out by workers in the local Sunday schools. There were quite a number of delegates from the Sunday school in the country, and two minutes reports were made from all the Sunday schools represented. Sunday at 3 p. m. the Cong. church was crowded at the Sunday school rally. The exercises consisted of music and brief addresses by the pastors. All seemed to feel that it was good to be there.
Monday evening a large audience filled the Congregational church to listen to speakers from Minneapolis. Very rarely, indeed, has it been the privilege of a Brainard audience to listen to a program of such uniform excellence. Rev. Jas. McAllister spoke interestingly on the aim of the Sunday school.
Rev. G. R. Merrill D. D. followed with an address on Bible study. Dr. Merrill is an expert in this department. He has conducted classes in Chautauque assemblies and Biblical institutes, and has no superior in the state. All present will never forget his exposition of the 23rd Psalm. It was very difficult to follow such a speaker and hold the attention of the audience. But Mrs. O. S. Chapman succeeded perfectly in her illustrated lecture on Kindergarten methods in the Sunday school. Mrs. Chapman is the wife of a physician of prominence and has a primary class of 300 members in Park Avenue Congregational Church, and is considered to be the leader in her department. She will be sure of a large audience whenever she may favor Brainard people with an address.
She gave an informal talk to mothers in the Baptist Church on Tuesday morning.
A Record Breaker.
Attorney F. F. Price returned Thursday evening from Brainard where he transacted some legal business. "If anyone had told me except Judge Holland I wouldn't have believed it, and I hardly expect you will believe me, but I'll tell it just the same," said Mr. Price to the Herald yesterday. "Proceed," interrupted the Herald, "your word is as good as your note." "Well, the Brainard & Northern Mills did what appeared to me a wonderful stroke of business this week in the line of lumber manufacturing. The company cut logs on Leech Lake, hauled them to the mill, sawed them into boards, run them through the dry kiln, loaded cars and started a full train of the finished product on its way to Winnipeg on Monday. I wouldn't have believed it if it wasn't a record breaker. I don't know anything about log-rolling.—Grand Rapids Herald.

The street commissioner was instructed to notify Mr. McKay to have the Fourth street crossing repaired.
Motion was made and carried that the matter of purchasing a steam road roller and rock crusher be referred to the street committee with power to act. Council adjourned.
About Shoes.
Notwithstanding the admiration we have for Whittier's poem of "The Barefoot Boy," and the interest we feel in the youngster, mankind in all ages has been prone to shoo his feet. Propositions were received from N. W. Harris & Co., and the First National Bank of Brainard, for the purchase of the \$7,000 bonds, to be issued Dec. 11, 1895, the proposition of the First National Bank being accepted, and the city attorney was instructed to submit a resolution conforming to the motion.
Jas. McCabe was granted a liquor license and his bonds approved.
The following resolution was adopted:
Resolved, By the Council of the City of Brainard, That that part of the road leading Oak street at the southwest corner of the southeast quarter of the northeast quarter of Sec. 30, T. 45 N., R. 30 W., in the City of Brainard, in Crow Wing County, Minnesota, and thence running across said 40-acre tract of land easterly to a northwesterly corner and crossing the east line thereof a few rods south of the northeast corner of said 40-acre tract of land is vacated and abandoned.
The following resolution was adopted:
Resolved, By the Council of the City of Brainard, That the sum of \$1000 be raised by taxation upon the taxable property of the City of Brainard for the next fiscal year, the rate of such tax levy and the purpose for which the same is made to be as follows, to-wit:
Sinking fund.....1 mill
Interest on bonded debt.....5 mills
Water rental.....4 mills
The aforesaid tax is hereby levied upon all property, real and personal, within said City, except such as may be exempt by law.
Communication from the Superintendent of State Farmers' Institute was read and referred to the finance committee.
The street commissioner was instructed to notify Mr. McKay to have the Fourth street crossing repaired.
Motion was made and carried that the matter of purchasing a steam road roller and rock crusher be referred to the street committee with power to act. Council adjourned.

The Siamese shoe has the form of an ancient canoe, with a gondola bow and an open toe. The sole is made of wood and the upper of inlaid wood and cloth, and the exterior is elaborately ornamented in colors, and with gold and silver.
The sandal worn by the Egyptians is composed of a sole made by sticking together three thicknesses of leather. This is held to the foot by passing a band across the instep. The sandal is beautifully stitched with threads of different colors.
The Mussulman's shoe is of heavy leather. It is adjusted to the foot by a wide leather strap, which runs from the heel and buckle over the instep. The only ornamentation is the fastening of two leather thongs on the right side of the toe.
In our own country, shoes are of almost infinite variety in both material and style. There are those for the house, the carriage, and for walking. The wearing of shoes, however, does not imply that you should walk to Chicago, Peoria, St. Louis, Kansas City, Omaha, Lincoln, St. Paul, Minneapolis or Denver, when you can travel so safely, comfortably, swiftly and cheaply by the trains of the Burlington Route. Ask your home agent for tickets by this route, or write to W. J. C. Kenyon, Gen. Pass. Agent, St. Paul, Minn., for maps and information.

Notwithstanding the admiration we have for Whittier's poem of "The Barefoot Boy," and the interest we feel in the youngster, mankind in all ages has been prone to shoo his feet. Probably the cave-dwellers had no shoes, but as soon as man began to have an existence worth recording, he invented coverings for his feet. The Hebrew Scriptures, as antique as almost any writings contain frequent allusions to foot-gear, making it certain that shoes or sandals were in quite general use. In this connection, it is interesting to note the kinds of shoes worn by various nations.
The Portuguese shoe has a wooden sole and heel, with a vamp made of patent leather, fancifully showing the shape of the skin.
The Persian footgear is a raised shoe, often a foot high. It is made of light wood richly inlaid, with a strap extending over the instep.

The School Board.
The board of education held their regular monthly session on Monday evening at which time regular routine business was transacted. The finance committee were authorized to make a loan of \$3,000 to cover pay roll and expenses, and Mr. Skinner's salary was made \$75 per month from September until the close of the school year. Matters pertaining to the closing of the West Brainard school were laid over until the next regular meeting, at which time Mr. Cullen will present a petition to the board. Miss Mary E. Burns was elected to succeed Miss Moulton as teacher, the ballot standing four for and three against. A large number of bills were allowed and the board adjourned.
Three men, father and two sons, named Ward, passed through the city Friday en route to the deer country north of Brainard. They live at Holding's Ford, and do a little hunting every fall. Not many years ago they could get good sport much nearer home, but now they go over 100 miles to find deer. * * Joseph Harris, who was for many years a resident of Pike Creek, was down from St. Matthias, Crow Wing county today. He bought a farm there a few years ago, and has now about 50 acres under cultivation.—Little Falls Transcript.

Special Announcement.
We have decided to continue the closing out sale of our Dry Goods Department for 30 days longer. Our stock justifies this, for it is still well filled with seasonable goods.

DELICATESSEN SMACKS.
Shrewd Students of Cuisine Are These Who Know How to Sell Goods.
Were the men who keep delicatessen stores born with their lips smacking? If not, they must have acquired the habit soon after birth, or they would not be able to throw so much unctious into the smack as they do when they are pointing out the savory qualities of the various articles in the stores. The delicatessen man has a watery eye, a rub-and-crease cheek and a mouth that seems to taste everything he has for sale. He takes a long carving knife in his hand and delicately touches with its point a piece of boiled ham.
"Very good," he says confidentially as he looks from you to the ham. "The best ham I ever tasted. (Smack.) Try a piece of this."
He cuts off a thin slice some two inches square, and as you put it into your mouth he smacks his lips to give it a flavor and looks at you expectantly with his liquid eyes. Should you say you don't care much about the ham he looks mildly hurt and dips up a piece of cheese from a silvery covering, letting off a volley of smacks as he does so.
"There," he says, "that is a piece of honeysuckle from age, made among the mountains of Afghanistan, with a dash of the bouquet that was so much in demand in Turkey in the days of the great Ali Bey." (Smack.)
He says all this with solemnity, though you know he is inventing the whole story, and gives you a piece of cheese that curls up the edge of the cheese knife with its strength as he smacks his lips and seems to think you should be carried away by the delicacy. You are almost, for it is strong enough to carry away anything, and he sees that it is not a success.
But he is not beaten, for he brings out pickles from half a dozen wooden bowls, with an average of three smacks for each bowl, and hands the samples to you in a saucer, requesting you to "just taste that pickle, and I'm sure you will say it is delicious." (Smack.)
The delicatessen man has a way of saying "Delicious!" that is almost as satisfying as a Delmonico feast, and you know, when you taste the pickle while he smacks his sympathy, that it cannot be as good as his "Delicious!"
The pickle is really very pleasant, and you buy a dime's worth of it, while he smacks his way to the pile of paper in which to wrap the wooden dish and smacks as he gives you 40 cents in change out of your half dollar.
You take up your pickle, but the delicatessen man has not done with you yet. He smacks over a highly spiced jar of funny shaped fish and then cunningly leads your attention to some preserves, and says, "salad dressing, and some aromatic vinegar, and some fresh tomatoes, and some particularly good coffee that he has just bought that morning, as he tells you, and what with the whiffs of different things and his smacks and his seductive talk, by the time you leave the store your arms are full of old packages and he has that first half dollar and another one as well.
He smacks you "Good afternoon," and as you go out you say to yourself, "That delicatessen man is too much for me." Of course he is. He is too much for anybody when he knows his business and can put in the smacks at the right moments.—New York Press.

A Dramatic Future.
It may be that it is better for a man to read anything than nothing, as the faintest lead of belief may be something higher than no faith at all. But we are inclined to be of Emerson's mind and shun the reading of any book that is not at the least a year old. Time will choose for us, and the muddy stream of periodical literature will not be worth our drinking until filtered by the agency. If this be true with books, it will even more assuredly be true with stage plays, which are but a subsidiary mode of education and by no means necessary for a right appreciation of life.
So we may be content to sit apart for a time, waiting for what may come forth from the present theatrical chaos, that we may not judiciously the ultimate survivors. For though in a sense we may be merely players upon the stage of the earth, yet our whole concern is not with mummery, and there are other things worthy men's notice below and above the stage speeches.—Macmillan's Magazine.

Foster's Best Song.
"Massa" in the Cold, Cold Ground" was considered by Stephen Foster to be the best of all his compositions. He got the idea from a slave of Covington, Ky., whom he heard bawling the fact that his good old master was dead, and that he and several other slaves who had been old and worn out would now pass into the hands of less kindly owners.

Think of me, dear.
When soft kisses are beaming
Perfect and clear
As love's tender dreaming.
Think of me, love,
When gloomy fumes hover
Grimly above,
The loved and the lover.
Remember the truth, heart,
In glory about you—
If I want come to worst,
I can live without you.
—Cleveland Plain Dealer.
Stage Armies.
I see that Mr. Balfour made an allusion in the house of commons to "the stage armies of Drury lane." In these realistic days even stage armies are not to be despised, but I remember an ingenious plan which Mr. Phelps used to adopt at Sadler's Wells. In "Henry V" in the march past Agincourt the troops defiled behind a set piece which rose breast high. Miss Tussard modeled 80 wax heads. These were fitted on dummy figures of wickerwork clad in the costume and armor of the period. Every man carried two of these figures, one on either side, attached to a sort of framework, which was lashed to his waist. Hence it seemed as if they were marching through a forest.

As they tramped past, banners streaming, drums beating, trumpets braying, the stage seemed crowded with soldiers, and the illusion was so perfect that the audience never once discovered the artifice. In politics, I suppose, the thing is simpler. You have only to shout loud enough, and the public will believe you have "the people" behind you.—Westminster Budget.
ALABASTER MINES.
An Industry in Pisa That Flourished Even in Ancient Times.
Thirty-two miles southeast of Pisa, in the province of that name, a very remarkable and very ancient industry is carried on. We refer to the alabaster industry, of which a full description from actual observation is given by Vis. General Carmichael of Leghorn in a foreign postoffice report. Volterra, where the alabaster is found, enjoys special distinction among places in the world which produce that commodity. The material, which is of five main varieties, is found in nodules imbedded in huge masses of limestone. At the end of each cavern whence it is extracted two or three men are to be seen working with small T shaped picks by the dim light of unprotected oil lamps of Etruscan pattern, which, by a singular tenacity of tradition, are still in
